

COILPLUS BERWICK SUCCESS STORY

“Coilplus Berwick is happy to be in Piqua and be a part of the Piqua community. The city of Piqua has been great to work with and extremely business friendly. Our location on the I-75 corridor is a great location for shipping and provides us with easy access to our customer base. The quality of people to choose from as employees is just phenomenal. We are pleased to be expanding our facility and investing further in the Piqua region.”

Nick Kunz, PLANT MANAGER, Coilplus Berwick

THE KEY POINTS

- Coilplus is committed to meeting the needs of their customers by providing steel products of superior quality, manufactured in the most cost-effective manner possible. Coilplus receives coils from the mill and then slits the steel coils to ship to their customers for use in the automotive industry.
- Coilplus Berwick originally started in 1969 in Columbus as Berwick Steel Company, and expanded in 1992 to Piqua with a 2nd facility. Coilplus Berwick was purchased in 1995 by Metal One which is a subsidiary of Mitsubishi Corporation. Metal One, headquartered in Japan, is the world's largest steel trading company.
- The original Piqua plant was 65,000 square feet. The addition is 60,000 square feet and will double the size of the facility to 125,000 square feet total. Coilplus Berwick continues to grow and diversify their customer base regionally and worldwide.
