

# HARTZELL AIR MOVEMENT SUCCESS STORY

*“This project will allow Hartzell Air Movement to help meet the growing demand for large, industrial fans, particularly for semiconductor manufacturers, mining, wastewater, and other heavy industrial applications. We were very pleased to make the High Bay Expansion project a reality in Piqua.”*

**Jeff Bannister**, CEO, Hartzell Industries

## THE KEY POINTS

- This \$6.8 million project, known as the High Bay Project, will add 30,000 square feet of high technology industrial manufacturing space to Hartzell’s Piqua operations and will feature a 23-foot under hook crane height and a new 30’ x 30’ sand blast room.
- Hartzell Air Movement currently encompasses both axial and centrifugal fans built for longevity within the rigorous requirements necessary for industrial environments.
- The history of the Hartzell Companies dates back to 1875. Hartzell Air Movement began manufacturing in 1927 and today is a leader in providing axial, centrifugal, fiberglass, cooling tower and heat exchangers, and heating equipment.
