## INDUSTRY PRODUCTS COMPANY SUCCESS STORY

*"Industry Products Company has been able to grow over the last 40 years because of the region's rich industrial heritage, our commitment to customized solutions for our customers, and IPC Team Members, who truly are our greatest asset. With our latest expansion, we have further positioned ourselves to be one of the top Tier One and Tier Two supplier of parts and components to the automotive industry and other markets."*

**Linda Cleveland** CEO

Industry Products Company (IPC) began construction in early 2012 on a 123,500 sq. ft. expansion to house additional product lines and warehousing to support its rapid growth. The \$3.8 million project was managed by Bruns General Contractors and was completed in November 2012.

IPC is a privately-held woman-owned company (NWBOC and WBENC certified) that was founded in 1966 in Piqua, Ohio as a die cutting operation to produce gaskets for the compressor industry. Today, 95 percent of their business is automotive related as a supplier to both automotive and light truck manufacturers as well as to Tier One automotive suppliers.

Now operating from a 337,000 square foot manufacturing operation in Piqua, the company produces a number of automotive trunk tire covers and cargo load floors. It also has seen significant growth of its in-transit protection, door watershield and acoustic die cut business for both automobiles and light trucks.
